Career Objective

Final Year B.Tech Computer Science undergraduate with strong foundations in Java, Python, Data Structures & Algorithms, OOP, DBMS, and Full-Stack Development. Experienced in building scalable web applications using the MERN stack and integrating REST APIs. Seeking an opportunity to contribute as an Application Developer while continuously enhancing software engineering and problem-solving skills.

Education

B.Tech: Computer Science Engineering

Pranveer Singh Institute of Technology (AKTU), Kanpur

2023 - Present

Percentage: 84.52 (till 5th semester)

Intermediate (CBSE board):

HAL Vidyalaya, HAL Township, Kanpur

Year: 2023

Percentage: 79.4

High School (CBSE board):

HAL Vidyalaya, HAL Township, Kanpur

Year: 2021

Percentage: 94.4

Skills

Programming Languages: Java, Python, C, JavaScript (ES6+)

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating System, Computer Networks

Backend & API Development: Node.js, Express.js, REST APIs, JWT Authentication, JSON

Databases: SQL (PostgreSQL/MySQL), MongoDB

Data Analysis & Visualization Tools: MS Excel, Tableau, NumPy, Pandas, Power BI, Matplotlib, Seaborn

Version Control & Platforms: Git, GitHub, Postman

Projects

InterviewIQ : AI-Powered Smart Interview Platform | MERN Stack | REST APIs | JWT | – Ongoing

- Developed the core logic for an adaptive interview system that generates role-specific questions by mapping resume keywords to job requirements.
- Architected a scalable full-stack MERN application with secure authentication, resume parsing (PDF.js), and seamless AI integration for personalized, role-specific interview experiences.
- Designed a solution to address the gap in real-world interview preparation by enabling adaptive, resume-based mock interviews with analytics and feedback surpassing traditional static practice platforms.

QuickBlog: AI-Powered Blogging Application | MERN Stack | Google Gemini API | [GitHub] Dec 2025-Feb 2026

- Used the Google Gemini API for automated content creation, focusing on structured data retrieval and prompt engineering.
- Used SQL/NoSQL logic to structure user data and blog posts, ensuring efficient data fetching and storage.
- Implemented JWT for secure login, demonstrating a foundational understanding of API authentication and user session management.
- Applied Data Structures to optimize image handling via ImageKit, ensuring the frontend stays responsive and performant.

Movie Recommendation System | Machine Learning | [GitHub]

March 2026

- Engineered a recommendation engine using TF-IDF Vectorization and Cosine Similarity to analyze text-based metadata and calculate content relationships.
- Developed frontend using Streamlit for real-time movie suggestions.
- Used Pandas and Scikit-learn for data processing and model building.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – October 2025
- Deloitte Australia Data Analytics Job Simulation on Forage - December 2025
- Prompt Engineering for Everyone Powered by IBM Developer Skills Network - March 2026
- HackerRank Certification in Java (Basic) - October 2025

Achievements

- **LeetCode** : Solved 200+ DSA problems
- **HackerRank** : 5-Star Gold Badge in Problem Solving
